Iñigo Barnechea Ganoza

Lawyer (Madrid Bar, ICAM) · Legal-AI co-founder · Sold AI to law-firm managing partners

Madrid · +34 650 676 753 · ibarnecheaganoza@gmail.com · inigobg.github.io
Authorised to work in Spain · Spanish and English (native, schooled in English) · French (B2) · Portuguese (learning)

SUMMARY

Owned sales at Agentic Labs, a two-founder legal-AI start-up: 25+ law firms reached, at least half met, 3 concurrent paid pilots priced and signed. Sold to managing partners; demoed to their lawyers. Earlier, M&A trainee at ONTIER, filling due-diligence tables by hand: a typical DD took 2–4 lawyers up to a week. Raised in Lima, with ties across Latin America (including ONTIER Lima partners), willing to travel there; native Spanish and English.

EXPERIENCE

Independent Madrid — Jan 2026 – Present

Product builder

- Build paid software products, under NDA, for individuals and companies with an idea but no way to build it, and websites for referred clients. Also developing own iOS and macOS apps in Swift.

Agentic Labs legal-AI start-up · Madrid — May 2025 – Jan 2026

Co-founder · Sales and backend

- Owned the sales cycle with managing partners, from first contact to signed pilot: reached **25+ law firms** through introductions, met at least half, personally demoed the product to their lawyers, agreed the price and closed **3 concurrent paid pilots** (paid for document analysis, vectorisation and a trial run).
- About 20 lawyers used it; pilot users prompted it 10–15 times a day for 2–3 final documents.
- Co-built the product, an agentic workflow that drafted SPAs and SHAs from each firm's own prior documents and correspondence, for lawyer review; built the backend (TypeScript, with a custom JavaScript agent layer; Claude Opus for complex reasoning, a low-cost model for simpler tasks).
- Learned what drives and blocks adoption: managing partners were keen to adopt AI and staff turnover drove demand, but firms' document storage was not AI-ready and older users needed much more training. Closed the company because hosting costs did not fit the unit economics needed to scale.

ONTIER international law firm · Madrid — Sep 2024 – May 2025 · May–Dec 2022

Corporate & M&A trainee

- Supported 3 due diligences (2 buy-side, 1 sell-side): reviewed Intralinks and Datasite data rooms, filled DD tables by hand and assisted with Q&A. A typical DD (200–300+ documents) took 2–4 lawyers half a week to a week.
- Coordinated clients, counterparties and local counsel on cross-border Spain–Latin America matters (Peru, Argentina, Colombia, Mexico), including purchase agreements and a restructuring.
- Worked on 8–10 buy-side and sell-side transactions (share and asset deals, PE/growth, reorganisations, JVs), small-cap and mid-market, across B2B, SaaS, industrial and retail.
- Drafted and reviewed NDAs, LOIs, SPAs, SHAs and MoUs; helped with signing, closing and post-closing. In 2022, also prepared client presentations and research memos.

EDUCATION

IE Law School Madrid — 2024

Master's in Legal Practice (Máster de Acceso a la Abogacía y Procura) + LL.M. in Business Law · GPA 8.75/10
