IÑIGO BARNECHEA GANOZA

Lawyer (Madrid Bar, ICAM) · Legal-AI co-founder · Sold AI to law-firm managing partners

Madrid · +34 650 676 753 · ibarnecheaganoza@gmail.com
Authorised to work in Spain · Spanish and English (native, schooled in English) · French (B2) · Portuguese (learning)

SUMMARY

Spain-qualified lawyer. As an M&A trainee at ONTIER, drafted and reviewed SPAs and SHAs and worked on Spain–Latin America matters. Then co-founded Agentic Labs, a legal-AI start-up, and sold its drafting agent to law-firm managing partners: 25+ firms contacted, at least half met, 3 concurrent paid pilots. Wrote a 2023 thesis on the EU AI Act while it was still a proposal. Raised in Lima, with personal and professional ties across Latin America (including ONTIER Lima partners); willing to travel there.

EXPERIENCE

Independent Madrid — Jan 2026 – Present

Software developer

- Build paid software products, under NDA, for individuals and companies with an idea but no way to build it, and websites for referred clients. Also developing own iOS and macOS apps in Swift.

Agentic Labs legal-AI start-up · Madrid — May 2025 – Jan 2026

Co-founder · Sales and backend

- Owned the sales cycle with managing partners, from first outreach to paid pilot: contacted 25+ law firms, met at least half, demoed the product to their lawyers and closed 3 concurrent paid pilots (document analysis, vectorisation, trial run).
- Co-built the product, an agentic workflow that drafted SPAs and SHAs from each firm's own prior documents and correspondence, for lawyer review; wrote the TypeScript backend and custom JavaScript agent layer (Claude Opus for complex reasoning, a low-cost model for simpler tasks). About 20 lawyers used it; pilot users prompted it 10–15 times a day for 2–3 final drafts.
- Learned what drives and blocks adoption: managing partners were keen to adopt AI and staff turnover drove demand, but firms' document storage was not AI-ready and older users needed far more training. Wound it down when hosting costs did not fit the unit economics needed to scale.

ONTIER international law firm · Madrid — Sep 2024 – May 2025 · May–Dec 2022

Corporate & M&A trainee

- Supported 3 due diligences (2 buy-side, 1 sell-side): reviewed Intralinks and Datasite data rooms, filled DD tables by hand and assisted with Q&A. A typical DD (200–300+ documents) took 2–4 lawyers half a week to a week.
- Worked on 8–10 buy-side and sell-side transactions (share and asset deals, PE/growth, reorganisations, JVs), small-cap and mid-market, across B2B, SaaS, industrial and retail.
- Drafted and reviewed NDAs, LOIs, SPAs, SHAs and MoUs; helped with signing, closing and post-closing. In 2022, also prepared client presentations and research memos.
- Coordinated clients, counterparties and local counsel on cross-border Spain–Latin America matters (Peru, Argentina, Colombia, Mexico), including purchase agreements and a restructuring.

EDUCATION

IE Law School Madrid — 2024

Master's in Legal Practice (Máster de Acceso a la Abogacía y Procura) + LL.M. in Business Law · GPA 8.75/10
